### History

Orphaned at the stair step of a local bridge club, Jett spent his formative years counting cards. As a result he has significant trouble with numbers above 53.

When finally taught words, Jett spent years speaking only in rhyme. While this power has rarely helped in any significant way, it did lead him to his eventual career. Apparently he was finishing a poem in the rain:

Though the rain had become quite torrential  
One fact Jett saw was evidential  
He'd try villainy  
'Til he reached fifty-three  
Though this logic might not be sequential
